eMitter[®] TubeTrap

Digital pest control

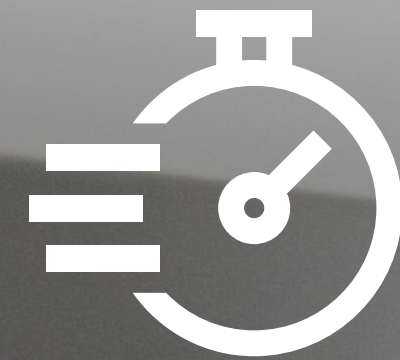

100% made in Germany

• Highest Security in IoT

Latest and most secure connection via SIM card

LTE-M (Cat-M1) and NB-IoT

No false alerts

Sensor-controlled catches, not triggered by vibrations or similar.

No infrastructure required

No routers, repeaters or gateways are required (as with insecure Wifi or LoRa)

Worldwide connectivity

Includes a worldwide flat rate and sends signals directly to our cloud or to you via API.

No false alarms due to vibration

App access to all traps

Software updates over-the-air

MQTT encrypted data transmission

Stand-alone (integrated SIM card)

Secure server structure

Advanced wireless standards (LTE-M / NB-IoT)

Integrated hygiene barrier

Long battery life (3 years+)

Rechargeable / exchangeable batteries

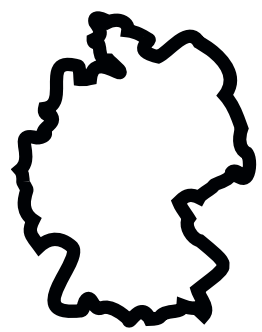

Explosion-proof batteries

Made in Germany

All rodent species, indoors and outdoors

The Tubetraps catch mice and rats safely and humanely, indoors and outdoors. No false alarms caused by vibrations or collisions and the Tubetraps naturally distinguish between "rodent caught" and "empty catch" by sensor control.

Made in Germany

Our software and hardware are developed and produced in Germany

Long battery life

Rechargeable batteries last up to 3 years

Modern technology

NB-IoT and Cat-M for signal transmission through solid walls

**Catch or no catch detection
+ motion detection**

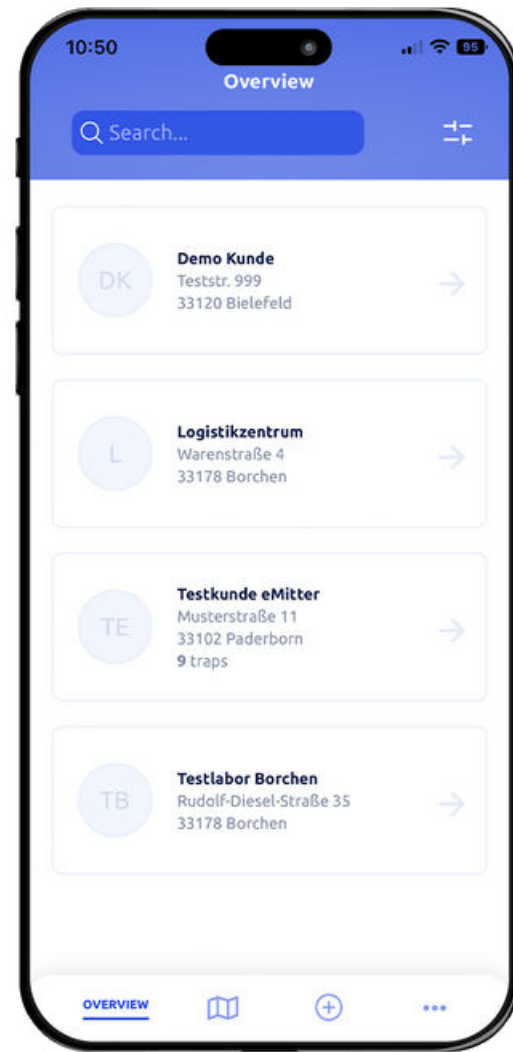

Change from motion detector to catch mode with timer and app control

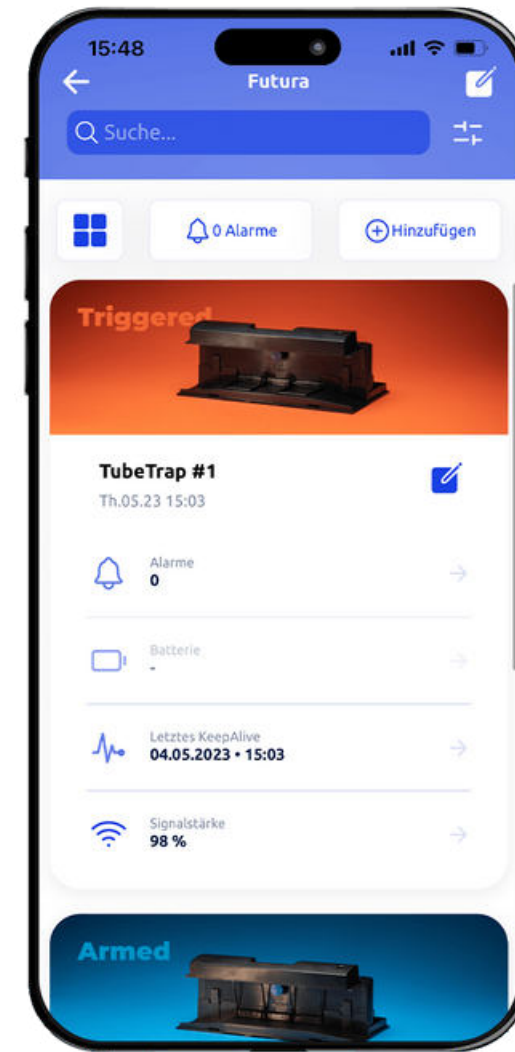

- ✓ Very high catch rates thanks to barrier-free tunnel design.
- ✓ Monitoring or trapping with timer function. Adjustable via app or web.
- ✓ **Weekend mode:** Traps can be switched from "catching" to "monitoring". When switched to monitoring, Tubetrap records movement and informs you about it.
E.g. from Friday 17:00 - Sunday 0:00 for animal welfare law compliant service.

eMitter® App

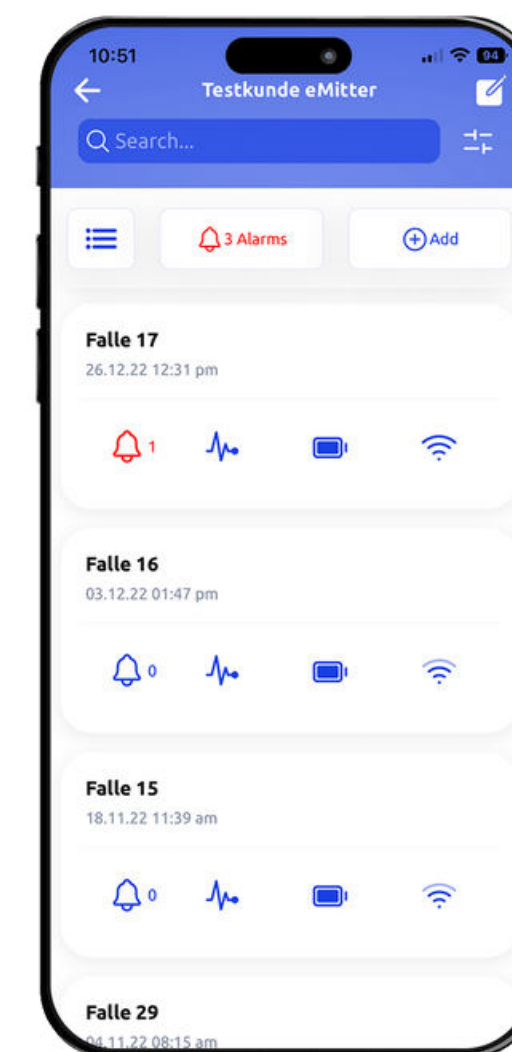

Software first

Receive emails or push messages to the Apple and Android eMitter app, or via our proven web login and even via API interface, directly to your or other softwares.

Overview

All traps are visible in a preview image in the app with current status, but also as a clear tile view and distinguishable between: Catch, No Catch, Movement Alarm and more.

Control

Any number of locations and users, heatmap function, email messages and more.

Manage pictures

Save images of exact Trap locations for proper site management and save images of catches online or via app for documentation purposes.

Motion Detector and Trap

✔ Monitoring mode: when switched to monitoring, the Tubetraps counts rodent movement and transmits it.

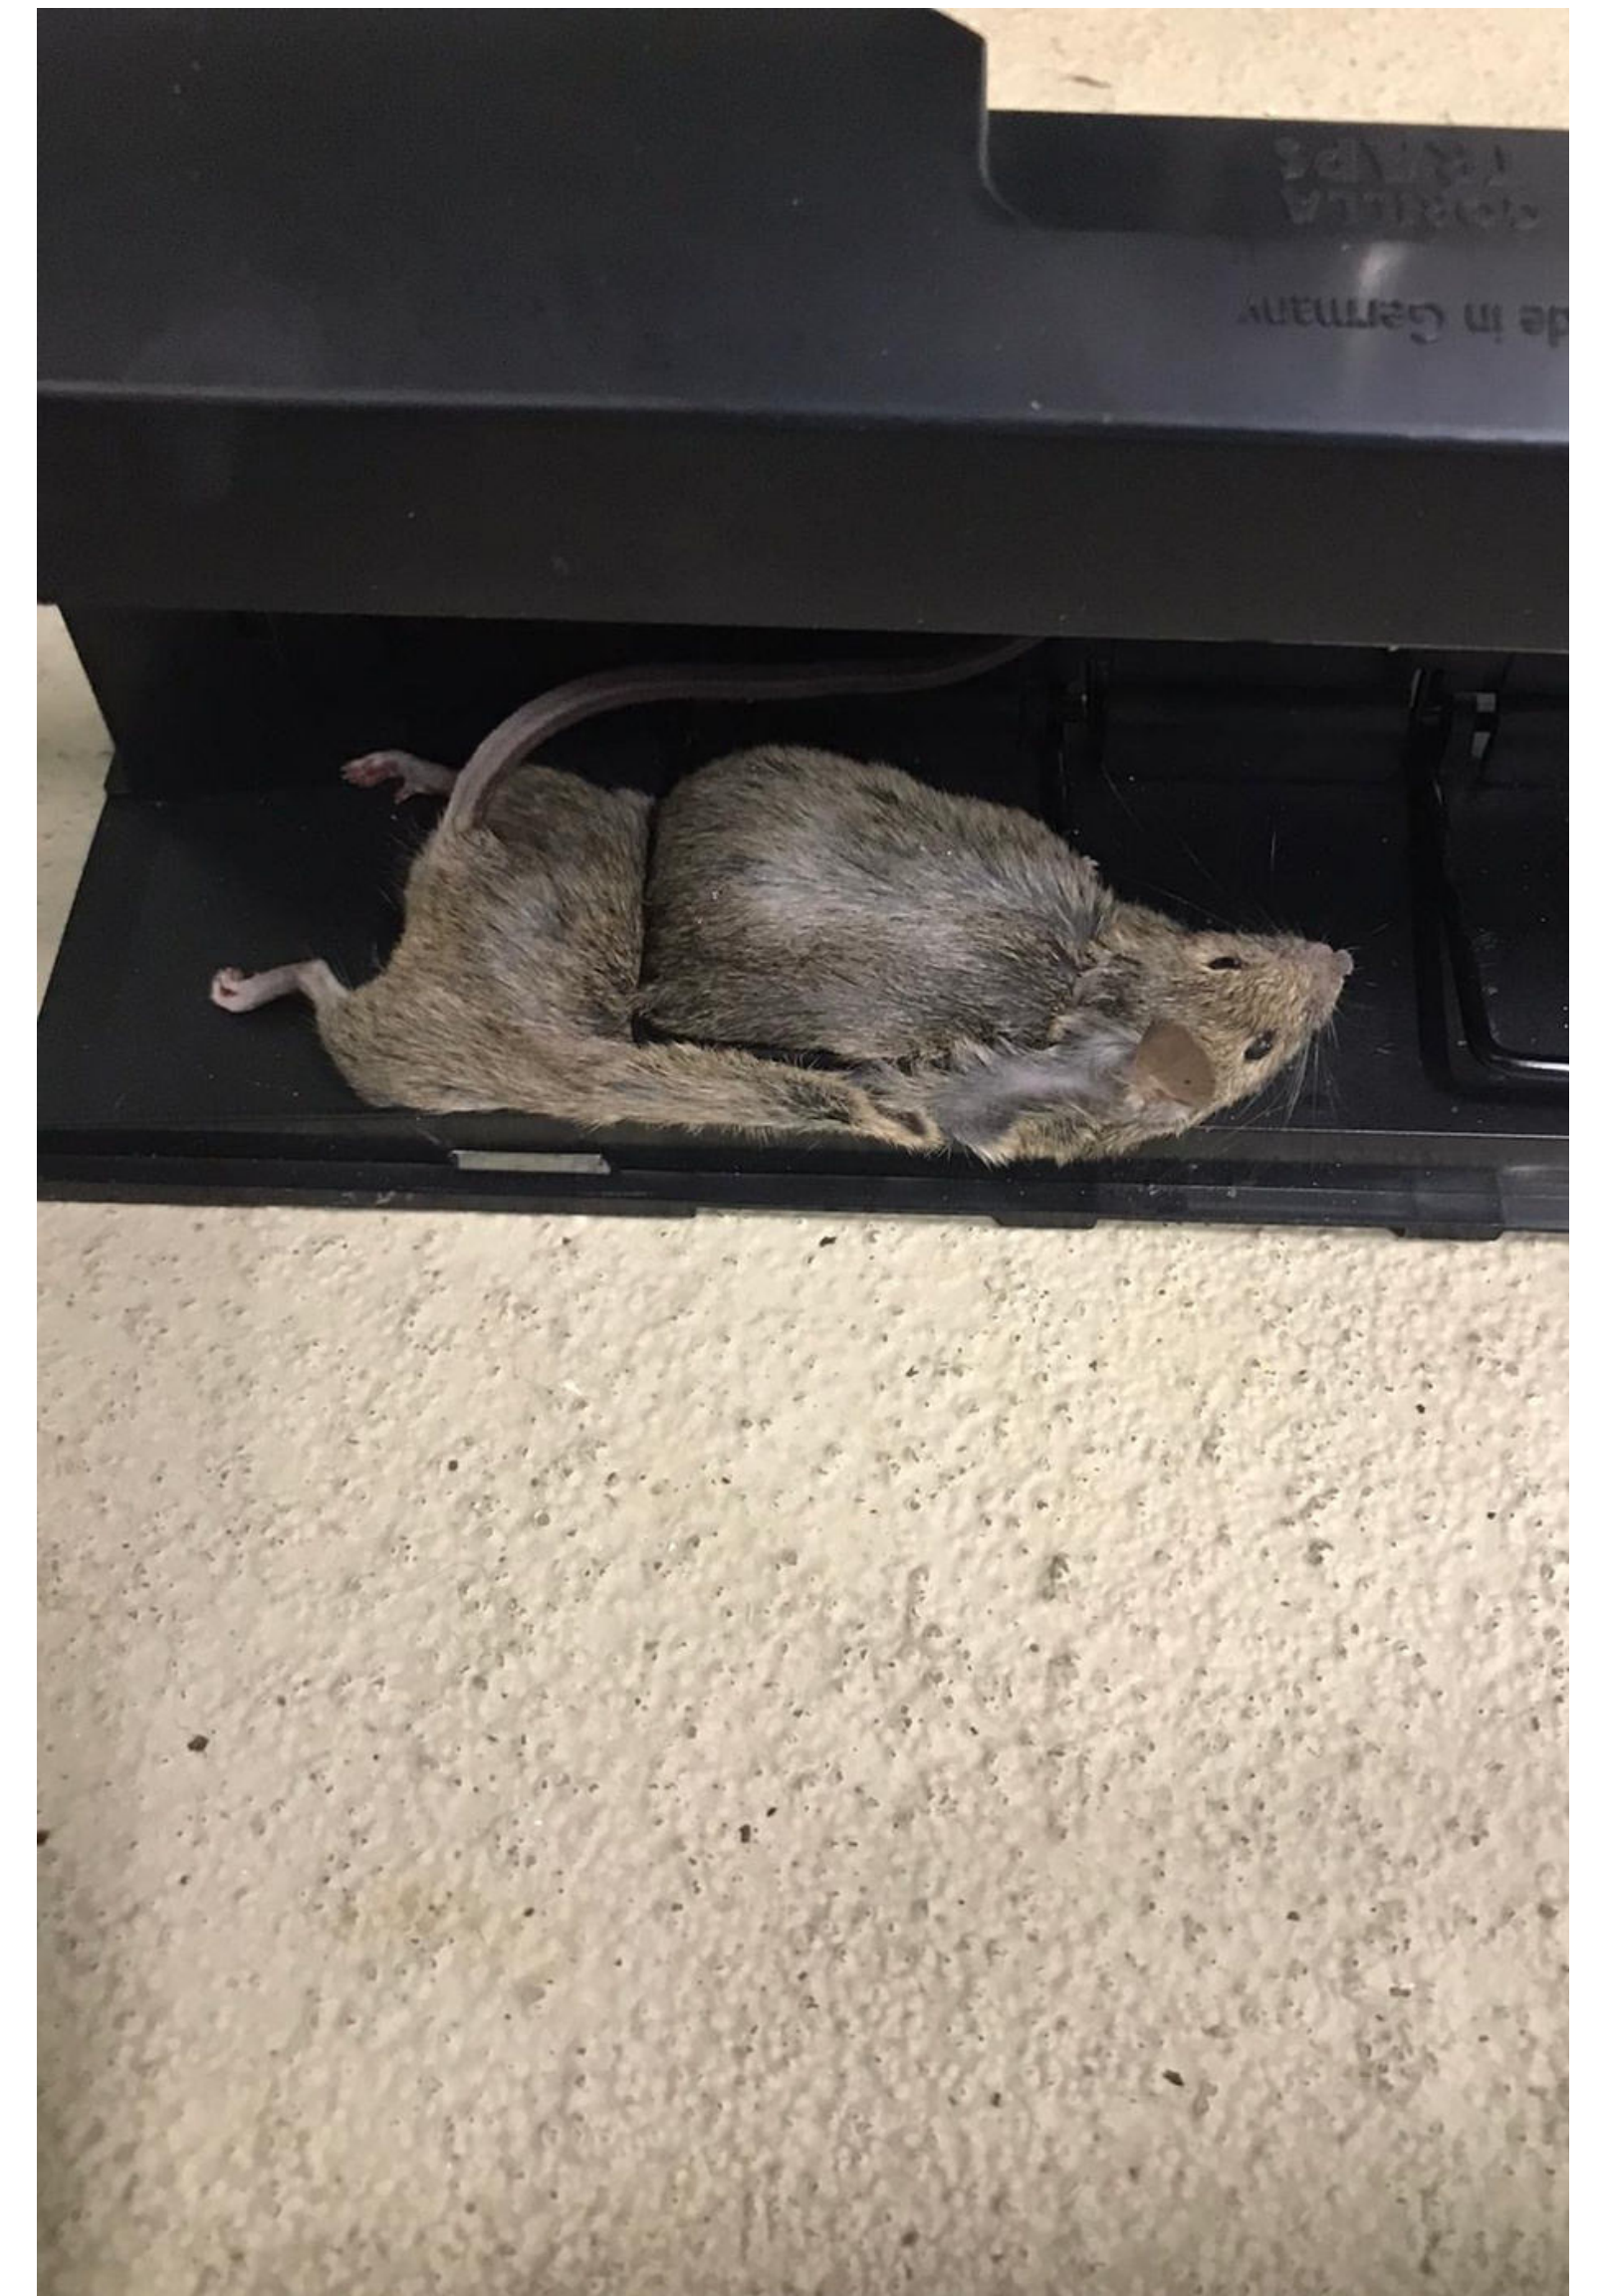

✔ In the middle of the Tubetraps you'll find a spot for a Nara[®] Stic (allergen-free, long-lasting) for perfect monitoring.

✔ Set an individual "timer" so the trap catches Mon-Fri and only monitors Sat-Sun, for example.

Humane Effective Hygienic

- Safe and humane trapping for mice and rats
- Indoor and Outdoor (EPP Outdoor box to be launched in October 2023; also working with eMitter Direct and more)
- "Hygiene wall separation" for hygienic cleaning and removal of rodents without having to touch space near the carcass.

The power of knowledge

Traps automatically share their locations

Even on the largest production lines you stay on top of your pest control and thanks to our heatmap you can see directly where rodents are caught for IPM actions.

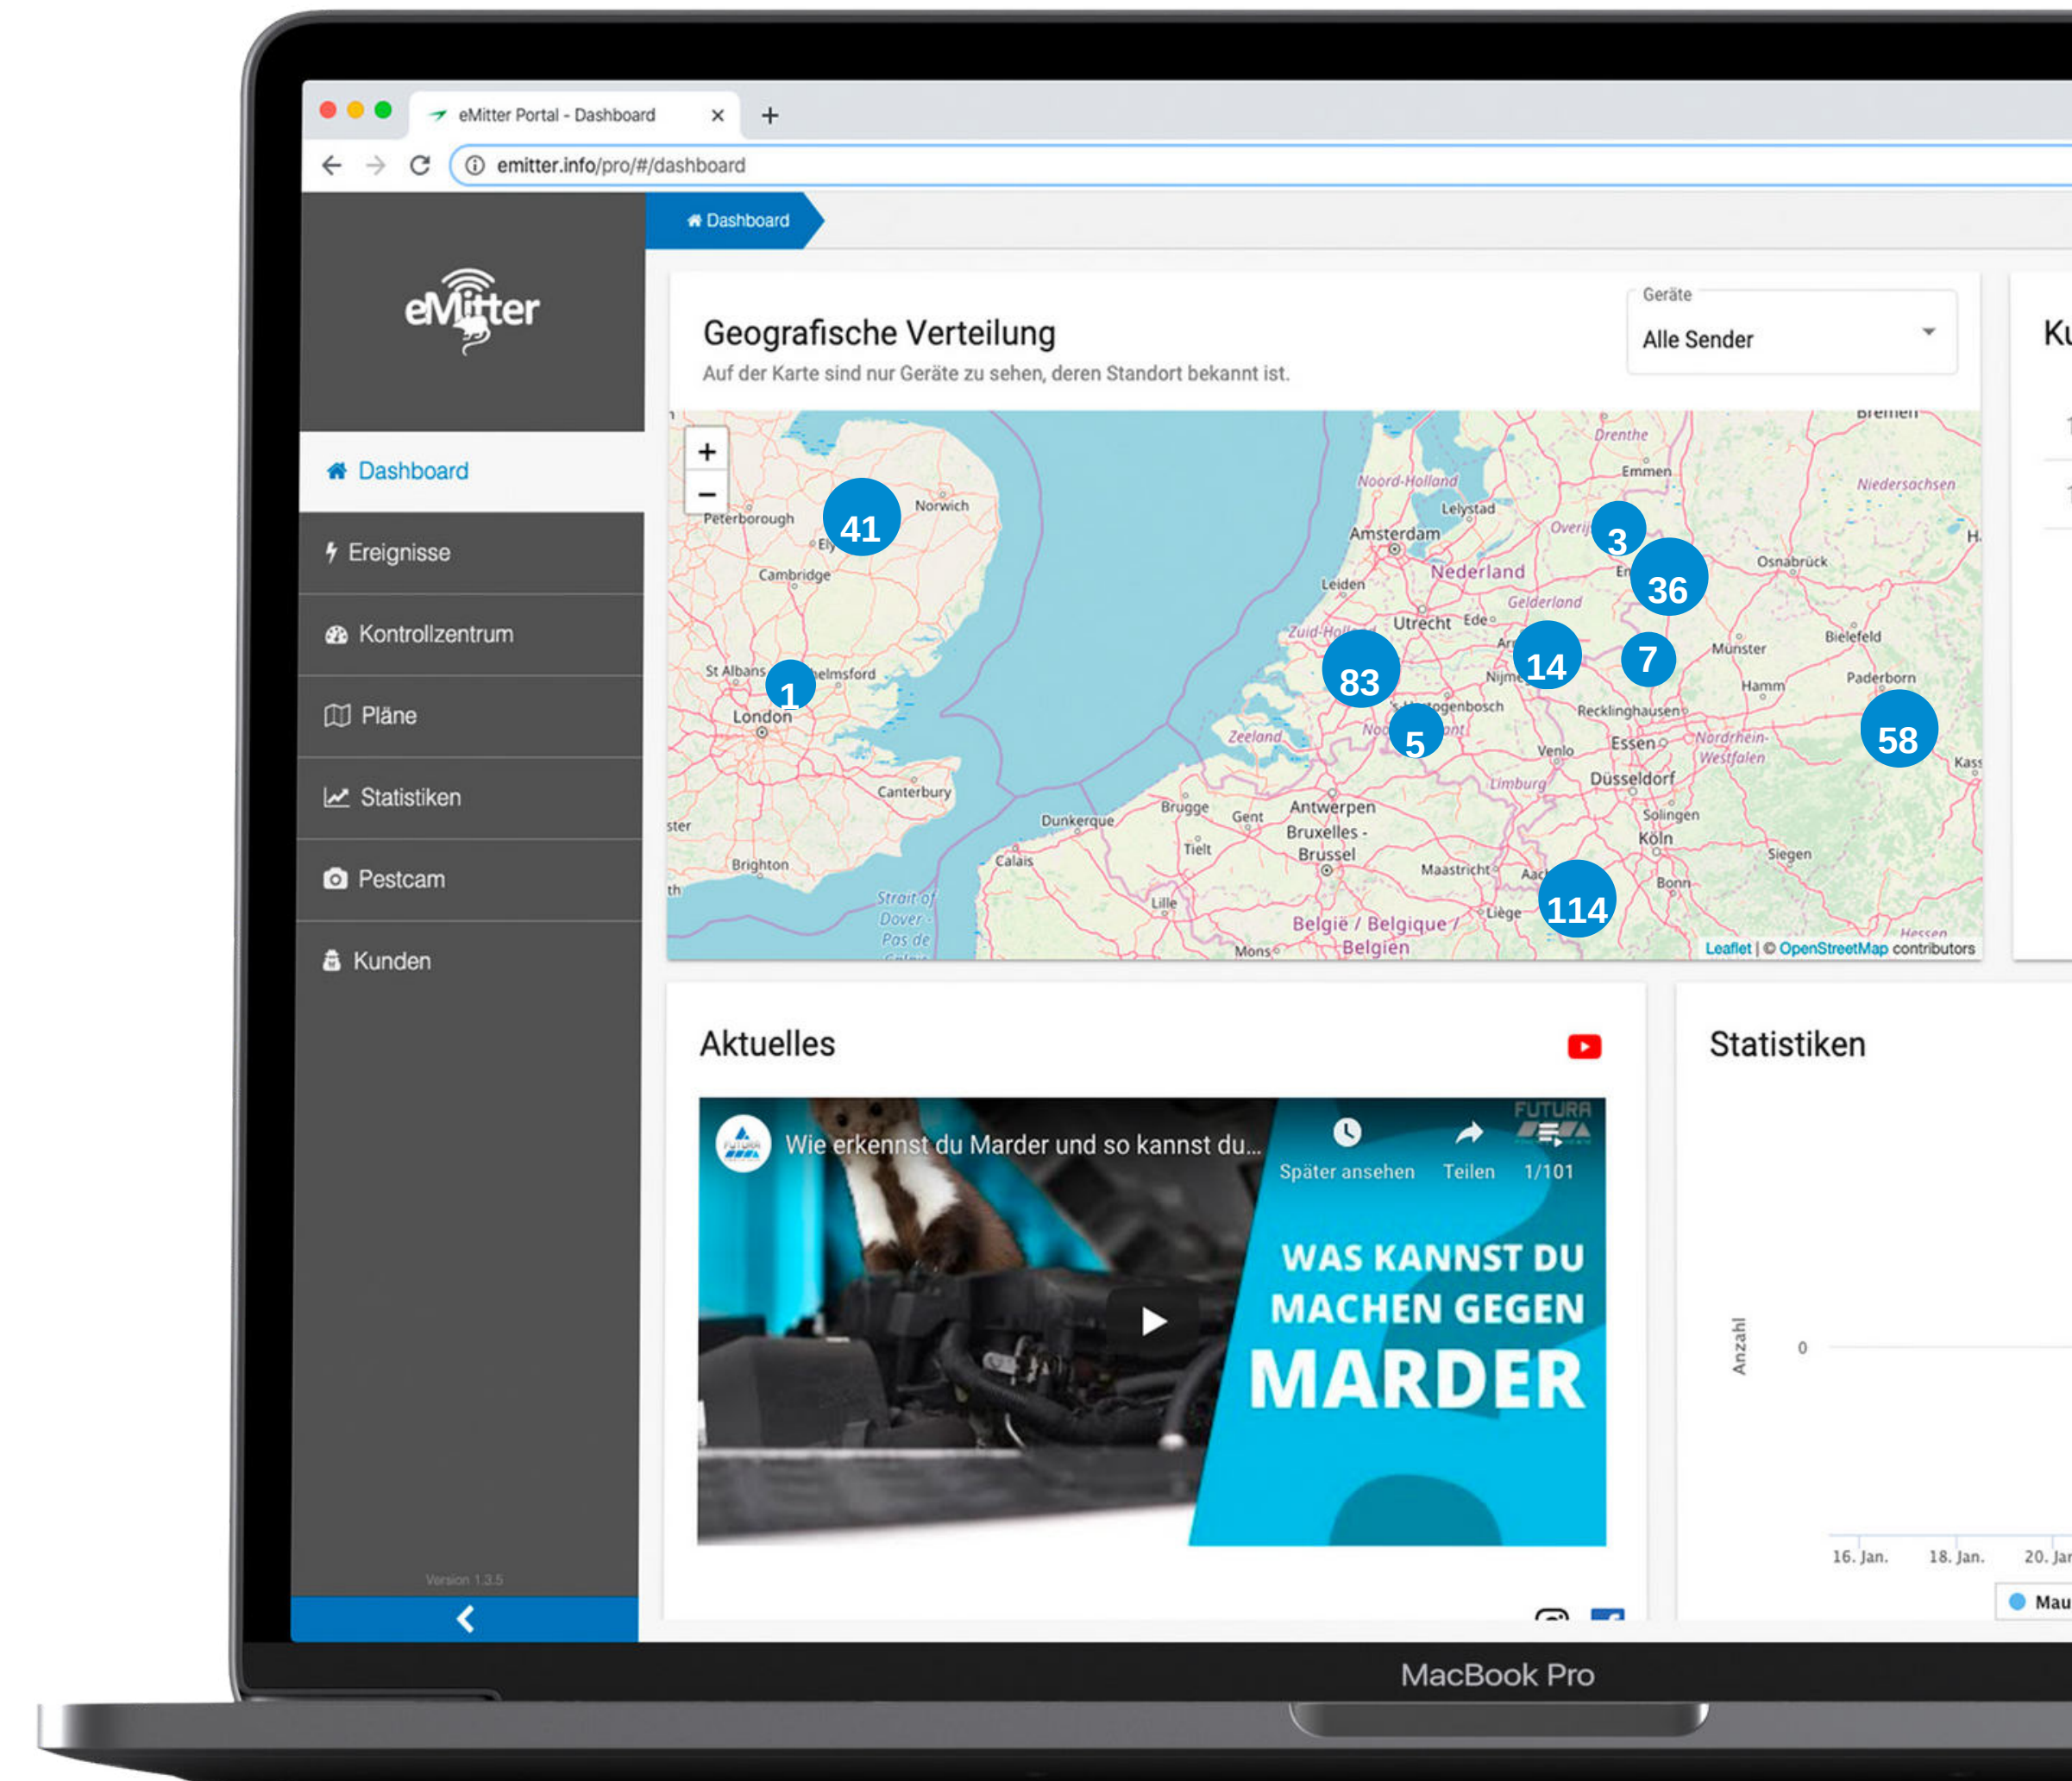

API for data integration into leading softwares

For over 10 years we have worked with leading pest control software companies such as PestScan, Hygitec, Nector and others. Likewise, we can work directly with your systems and interface with your IT effortlessly.

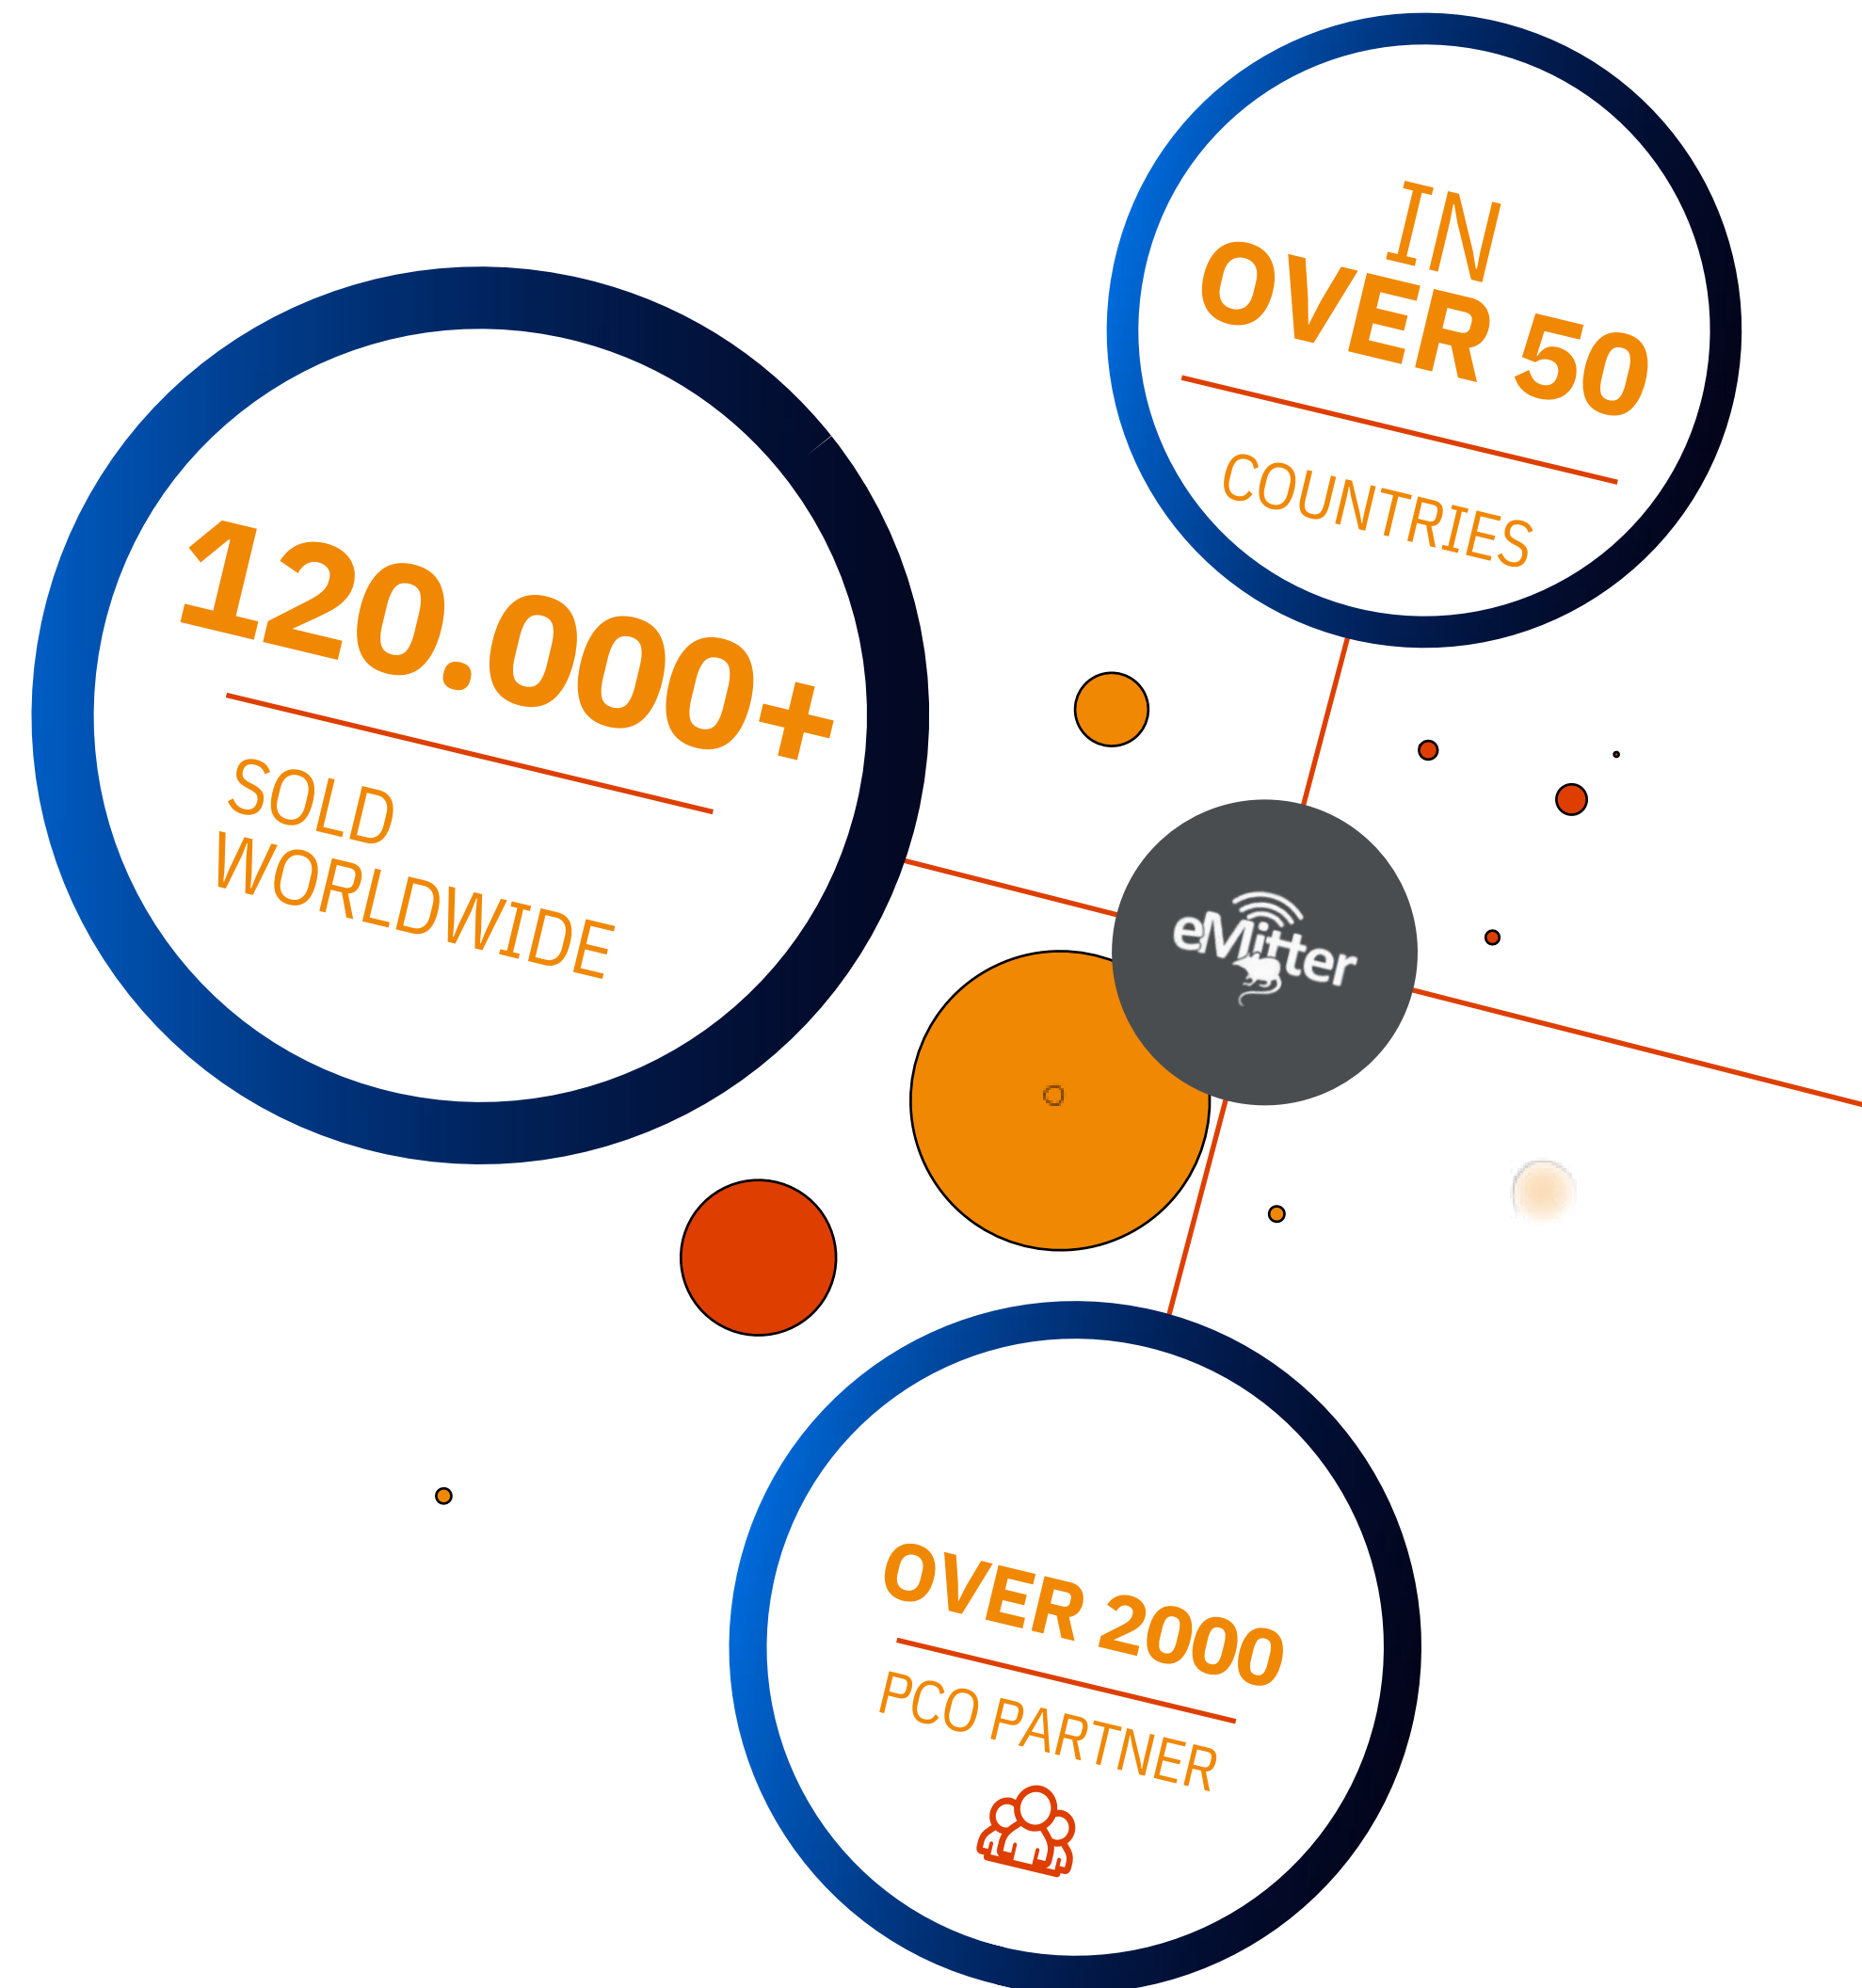

Everything at a glance

- Statistics and pictures of the catches
- Battery capacity in %, network coverage in %
- Easy management of thousands of traps
- User administration (customer, PCO etc.)

Thousands of satisfied customers

Pioneer in IoT Tech for Pest Control:

Since we've built the first IoT Mouse Trap in 2006, we have reinvested millions of Euros into our business, preparing for the digital future of pest control.

Emitter products are engineered, designed and manufactured in Germany with passion for security and lasting quality.

Innovation from Tradition

Since 2006 we have been manufacturing patented IoT solutions for professionals worldwide. Our Tubetraps is the only trap that combines motion detection and trapping in one, for rats and mice, indoors and outdoors.
